Experience

FloripaBit

Software Engineer

Remote

Jun 2023 - Present

- Led the adoption of asynchronous processing with BullMQ, structuring async jobs for report generation, email delivery, and sign-up flows, reducing coupling and keeping the API responsive.
- Cut report generation time by 50% by reimplementing the processing with Node.js streams, keeping memory usage constant even with large data volumes.
- Built 2 new products end to end using Svelte and NestJS.
- Contributed to the maintenance of a legacy React system, delivering new features, bug fixes, and new Node.js APIs.
- Developed solutions for a PoC of a migration platform for the free energy market, taking first place at the CCEE Hackathon.

Plathanus

Full-Stack Developer

Palhoça - SC

Jan 2022 - Jun 2023

- Worked across the full front-end cycle on client products (Tabas, Via Laser, Sodexo), building responsive interfaces and reusable components with a focus on user experience.
- Built Sodexo's KPI dashboard with interactive ApexCharts (including drill-down) and XLSX report exports.
- Consumed and proposed improvements to the design system, and maintained legacy code and Via Laser's React Native app.
- Promoted to Mid-level I; selected as a success case in the company's first English program, which earned me the spot on the international project (Tabas).

Cubo Sistemas

Full-Stack Developer

Tubarão - SC

Jul 2020 - Sep 2021

- Worked on the front-end of cobCloud (a modular online billing platform), building screens and integrating APIs with React, Node.js, and JavaScript.
- Integrated an open-source PHP API to issue and send electronic invoices (NF-e), delivering the system end to end in staging.
- Progressed from intern to top-tier technical support and, on my own initiative (study projects + courses), transitioned into development.

Skills

- **Technical:** Javascript/Typescript, Node.js, Nest.js, React, Next.js, Tailwindcss, BullMQ, Docker, Git, Cypress, Playwright, Svelte, A11y
- **Languages:** Portuguese (Native), English (B2/C1)

Education

UNISUL

B.S. in Computer Science

Tubarão - SC

2017 - Jul 2022
